

Module: m/00/140

'timeware® SQL database backup overview...'

Configuring a timeware® system requires commitment from both the user and the timeware® team – remember that lost data is unrecoverable!

Backing up your timeware® SQL database is essential!

SQL management tools backup method (*recommended*):

Include the timeware® database in your existing company SQL backup procedure.

timeware® scheduled SQL backup method:

If the recommended method is not possible, we suggest using the timeware event handler scheduled SQL backup procedure (module m/01/103).
